Carbon monoxide
can be deadly –
are you up to date
with best practise
test procedures?

Carbon Monoxide testing 2017

Practical test procedures

Master Plumbers, in partnership with Energy Safe Victoria and the Victorian Building Authority, is pleased to present Carbon Monoxide testing courses for Victorian plumbers.

This training course will provide you with the skills and knowledge to use carbon monoxide (CO) testing equipment and complete the practical procedure to test gas appliances for CO emissions.

The course will cover the process you should follow to identify situations that could result in CO spillage within a residence.

It will reference the following Gas Information produced by Energy Safe Victoria (ESV);

- ▶ Sheet No. 37 Carbon monoxide measuring equipment
- ▶ Sheet No. 38 Checking gas appliances for spillage using Carbon monoxide (CO) detection equipment
- ▶ Sheet No. 44 Carbon monoxide safe working level

Register now for one
of our **FREE** courses.
See over for details.

Note: Class sizes are limited to 30 so register quickly. Light refreshments will be available.
