Re: Gas Safety (Safety Case) Regulations 2018 and Gas Safety (Gas Installation) Regulations 2018

Dear Mr Jenkins

Australian Gas Infrastructure Group (AGIG) is one of Australia's largest gas infrastructure businesses, serving around 1.9 million customers across Australia. In Victoria, AGIG owns and operates two of the states three distribution networks; Multinet Gas Networks (MGN) and Australian Gas Networks (AGN), which collectively deliver gas to over 1.3 million Victorians in the states central, eastern and northern regions.

We welcome the opportunity to submit our comments to Energy Safe Victoria (ESV) on the proposed changes to the above regulations. This follows both MGN and AGN initial submissions to ESV on 6 October 2017 responding to issues raised in the General Discussion Paper issued on 19 September 2017.

AGIG has no further comments on the proposed changes and welcomes these amendments.

Please contact [REDACTED] if you would like any further assistance.

Yours sincerely,

[REDACTED]
